Q-3

The given picture shows us a guy teaching a child how to use a rocket launcher (lethal weapon used in wars).

§ This picture won Pulitzer ~~prize~~ prize.

I think this picture shows the true nature of our beings, the war like attitude in us. Many of the countries are still underdeveloped and they find hard in supplying basic necessities to their people. Small kids don't have schools for their proper education.

That's why they find themselves learning false activities, weapons like these.

YASH GUPTA

Families send their children to these

false activities. ~~an~~ ~~the~~ This picture is a message to the well developed countries to take strict action against these activities and try to stop this culture to the coming generation. But the well developed countries are always aggressive against these countries, uses the physical way to ~~find~~ solve problems.

Countries must improve their financial condition and help the children to secure their future. The child doesn't know what is wrong/right. They just do what people taught them. That's why it's important to give them proper education that they deserve.
